Date: - 03-09-26

Notice

Intended for	MLS 1 st semester Students
Subject	Infection Control and Hospital Safety Workshop

The Department of Medical Laboratory Sciences is organizing an "Infection Control and Hospital Safety" workshop for MLS 1st Semester students.

Date: 10 September 2026

Time: 10:00 AM onwards

Venue: Room 403, Block E

Activities:

- Hand Hygiene
- Spill Management
- PPE Donning & Doffing

A Poster Making Competition on "Infection Control and Hospital Safety" will also be conducted at 1:30 PM onwards.

All students are required to participate actively.

Name of the Department	SARASWATI COLLEGE OF PHARMACY GHARUAN (Allied Health Sciences Division I, Department of Medical Laboratory Science – MLS)
Name of Event:	Infection Control and Hospital Safety Workshop
Date of Event:	10/09/2026
Place of Event:	Block e, Classroom 6-403
No. of Participants:	MLS 1 st semester students
Time	10:00 AM onwards
Coordinator Name	Ms Jaspinder Kaur
Email of Coordinator:	Jaspinder2112@gmail.com
Objective of the event	• To create awareness among students regarding infection prevention and hospital safety practices. • To train students in proper hand hygiene techniques. • To demonstrate effective spill management procedures in healthcare settings. • To provide practical exposure to PPE donning and doffing procedures. • To promote safe laboratory and hospital practices among future healthcare professionals.
Outcome of the event	• Students gained knowledge regarding infection control measures and hospital safety protocols. • Students learned the importance and correct steps of hand hygiene. • Participants developed practical understanding of spill management procedures. • Students became familiar with the correct sequence of PPE donning and doffing. • Awareness regarding prevention of healthcare-associated infections and occupational hazards was enhanced.
Event/ Activity Report: The Department of Medical Laboratory Sciences, Saraswati College of Pharmacy, Gharuan, organized an "Infection Control and Hospital Safety Workshop" for MLS 1st Semester students on 10 September 2026 at 10:00 AM in Room 403, Block E. The programme was conducted with the objective of enhancing students' knowledge and practical skills related to infection prevention, hospital safety, and occupational health practices.	

The programme commenced with an introductory session highlighting the importance of infection control measures in hospitals, laboratories, and healthcare settings. Students were informed about standard precautions, healthcare-associated infections, and the role of healthcare professionals in maintaining a safe environment.

Three hands-on activities were conducted during the programme:

1. Hand Hygiene Activity:

Students were trained in the proper handwashing technique and hand rub method based on standard infection control guidelines. Demonstrations emphasized the importance of hand hygiene in preventing the transmission of infections.

2. Spill Management Activity:

Students were provided practical demonstrations on the safe management of biological spills. The activity included the use of disinfectants, spill kits, personal protective equipment, and proper disposal procedures to minimize contamination risks.

3. PPE Donning and Doffing Activity:

Students learned the correct sequence of wearing and removing personal protective equipment (PPE), including gloves, masks, gowns, and face shields. The activity focused on preventing self-contamination and ensuring personal safety while handling infectious materials.

Students actively participated in all activities and gained valuable practical exposure to infection prevention practices commonly followed in hospitals and laboratories.

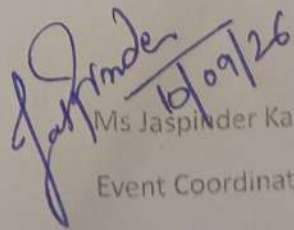

A **Poster Making Competition** on the theme **"Infection Control and Hospital Safety"** was also organized at 1:30 PM. Students prepared informative and creative posters highlighting hand hygiene, PPE use, biomedical waste management, and hospital safety practices. The competition encouraged students to express their understanding through visual learning and enhanced awareness regarding infection prevention.

The programme was highly informative and interactive. It successfully strengthened the students' understanding of infection control principles and prepared them to follow safe practices in healthcare and laboratory environments.
